

To the Sanitary Authority of the Borough of  
Lyme Regis.

Gentlemen,

I beg to hand you my annual report  
on the health & sanitary condition of the  
Borough during 1906.

Area. 1394 acres.

Population (census 1901) 2095. Estimated to the  
middle of 1906. 2109

Births. The number of births registered during the  
year was 39 (22 males & 17 females) Birth rate  
18.4 per 1000. Birth rate in 1905 was 17.9 per 1000.

Deaths. The number of deaths registered during the  
year was 35 (22 males & 13 females)

Death rate 17.06 per 1000. Death rate for 1905  
was 9.9 per 1000.

The average age at death was 53.4.

The ages at which death occurred were:

Under 1 year	2.
Between 1 year & 5 years	0.
" 5 " " 15 "	2.
" 15 " " 25 "	1.
" 25 " " 65 "	14.
Over 65 "	16.

Of those over 65, 10 were between 70 & 80, &  
4 were 80 & upwards.

The various causes of death were as follows:-

Heart Disease	4
Bronchitis etc	9.
Phthisis	3.
Accident	1
Cancer or Malignant disease	3.
Other causes	15.

Two inquests were held during the year.

Symptomatic Mortality: Nil.

Infant Mortality: Two Children under 1 year of age died during the year, giving an Infant Mortality of 51.2 per 1000 births. The Infant Mortality for 1905 was 52.6 per 1000 births.

Prevalence of Disease. Notification.

The year 1906 has been a most healthy one for during that period I did not receive a single notification of any of the seven notifiable diseases. We should consider ourselves most fortunate to have escaped infection from the epidemic of Scarlet Fever at Charmouth during the summer, when we consider our close proximity & constant intercommunication.

Water Supply. Our excellent supply continues to be most satisfactory.

Early in the year a piece of swampy ground, containing a small spring, about 100 yards above Twenty-acre Coppice, was fenced with posts & wire to prevent the cattle from polluting the water when they came to drink. A 3 inch iron pipe was laid in the centre of this plot to carry the water to the tank in Twenty-acre Coppice, & an iron drinking tank fixed for the use of cattle.

Sewerage & Drainage. Excrement Disposal.

The system of drainage continues satisfactory. Early in the year the new sewer in Cornhill St. was commenced. This extends from the river near the old Bull House under Cornhill St. to about

The middle of Monmouth St. It consists of 12 red ware pipes, which were laid in the old barrel stone sewer, receiving all the adjacent house drains. The ware pipes were laid in a good layer of concrete 2 ft. in thickness. There are 2 inspection chambers one in Cornhill St., & the other opposite No 8. Monmouth St.: also two ventilating shafts.

In October the Sericks extension draining was begun, which was completed during the year. This consists of 9 inch ware pipes, & extends from the foot bridge at Sericks to the lower mill - It receives in its course drains from Windsor Terrace & other cottages near. This sewer can be flushed by water from the river.

Isolation Hospital.. There is no Isolation Hospital, except two rooms set apart at the P.O. Buildings for the reception of infectious cases coming here by sea.

Sunshine & Rain.. The Registrar report is:-

Rainfall for the year was 30.89 inches, which is 1.28 inches below the average. Sunshine for the year was 1858 hours, which is 129 hours above the average.

I registered 31.24 inches of rain during the year.

Housing of the Working Classes.. Two new cottages have been built during the year. As the number of new cottages increases, so do the older & more inconvenient ones become overcrowded; e.g. five cottages are now vacant in Millgreen Court.

### Slaughter houses, Bake houses & Kilt houses.

These have all been periodically inspected, & here, with one exception, found to be kept in a sanitary condition. In August I drew your attention to the deficient water supply & defective drainage of the slaughter house in Poole's Court field, owned by Col. Herby, & occupied by Messrs Lord & Son. As landlord & tenant could not come to an agreement about the repairs, Messrs Lord, with your permission, built a new slaughter house at the back of their premises in Broad St., which is supplied with town water, & drains into the sewer under the bed of the river. The licence was transferred from the old building to the new.

The cow sheds were found to be in a satisfactory condition, & are for the most part situated in fields.

### Common Lodging House & Fried Fish Shop.

I consider them both exceedingly well managed.

Factory & workshops Act 1901. There are four factories (including Steam Laundry) & twenty workshops in the town. These were all found on inspection in a sanitary condition, & due attention was paid to other provisions of the Act: e.g. fire-escape, over-crowding, etc.

There is no home work done from any place in the town.

I am, Gentlemen,  
Your obedient servant,  
James Spurr

Feb 9<sup>th</sup> 1907.

\* Rates in Columns 4, 8, and 13 calculated per 1,000 of estimated population.

NOTE.—The deaths to be included in Column 7 of this Table are the whole of those registered during the year as having actually occurred within the district or division. The deaths to be included in Column 12 are the number in Column 7, corrected by the subtraction of the number in Column 10 and the addition of the number in Column 11.

By the term “Non-residents” is meant persons brought into the district on account of sickness or infirmity, and dying in public institutions there; and by the term “Residents” is meant persons who have been taken out of the district on account of sickness or infirmity, and have died in public institutions elsewhere.

The “Public institutions” to be taken into account for the purposes of these Tables are those into which persons are habitually received on account of sickness or infirmity, such as hospitals, workhouses and lunatic asylums. A list of the Institutions in respect of the deaths in which corrections have been made should be given on the back of this Table.

Area of District in acres (exclusive of area covered by water.)

NOTES.—(a) The separate localities adopted for this table should be areas of which the populations are obtainable from the census returns, such as wards, parishes or groups of parishes, or registration sub-districts. Block 1 may, if desired, be used for the whole district: and blocks 2, 3, &c., for the several localities. In small districts without recognised divisions of known population this Table need not be filled up.

(b) Deaths of residents occurring in public institutions beyond the district are to be included in sub-columns e of this table, and those of non-residents registered in public institutions in the district excluded. (See note on Table I. as to meaning of terms "resident" and "non-resident.")

(c) Deaths of residents occurring in public institutions, whether within or without the district, are to be allotted to the respective localities according to the addresses of the deceased.

(d) Care should be taken that the gross totals of the several columns in this Table respectively equal the corresponding totals for the whole districts in Tables I. and IV.: thus, the totals of sub-columns a, b, and c should agree with the figures for the year in the columns 2, 3, and 12, respectively, of Table I.: the gross total of the sub-columns c should agree with the total of column 2 in Table IV., and the gross total of sub-columns d with the total of column 3 in Table IV.

M. 191.

NOTES.—The localities adopted for this table should be the same as those in Tables II. and IV.

State in space below the name of the isolation hospital, if any, to which residents in the district, suffering from infectious disease, are usually sent. Mark (H) the locality in which it is situated, or if not within the district, state where it is situated, and in what district. The name of the authority by whom the hospital is provided should also be given. Mark (W) the locality in which a workhouse is situated.

\* This space may be used for record of other disease the notification (compulsory or voluntary) of which is in force in the district.

† These age columns for notifications should be filled up in all cases where the Medical Officer of Health, by inquiry or otherwise, has obtained the necessary information.

## NOTES TO TABLES IV. AND V.

---

- (a) In Table IV., all deaths of "Residents" occurring in public institutions, whether within or without the district, are to be *included* with the other deaths in the columns for the several age groups (columns 2-8). They are also, in columns 9-15, to be *included* among the deaths in their respective "Localities" according to the previous addresses of the deceased as given by the Registrars. Deaths of "Non-residents" occurring in public institutions in the district are in like manner to be *excluded* from columns 2-8 and 9-15 of Table IV.
- (b) See notes on Table I. as to the meaning of "Residents" and "Non-residents," and as to the "Public Institutions" to be taken into account for the purposes of these Tables. The "Localities" in Table IV. should be the same as those in Tables II. and III.
- (c) All deaths occurring in public institutions situated within the district, whether of "Residents" or of "Non-residents," are, in addition to being dealt with as in note (a), to be entered in the last column of Table IV. The total number in this column should equal the figures for the year in column 9, Table I.
- (d) The total deaths in the several "Localities" in columns 9-15 of Table IV. should equal those for the year in the same localities in Table II., sub-columns c. The total deaths at all ages in column 2 of Table IV. should equal the gross total of columns 9-15, and the figures for the year in column 12 of Table I.
- \*(e) Under the heading of "Diarrhœa" are to be included deaths registered as due to Epidemic diarrhœa, Epidemic enteritis, Infective enteritis, Zymotic enteritis, Summer diarrhœa, Dysentery and Dysenteric diarrhœa, Choleraic diarrhœa, Cholera and Cholera Nostras.
- In addition, and as regards deaths of children *under one year of age*, under the heading "Diarrhœa" in column 3 (Table IV.) are to be included all deaths classified as "Diarrhœal diseases" in Table V.
- Under the heading of "Enteritis" in Table IV., are to be included only deaths *over one year of age* registered as due to Enteritis, Mucro-enteritis, Gastro-enteritis, Gastric catarrh, Gastritis, and Gastro-intestinal catarrh, unless from information obtained by enquiry from the certifying practitioner or otherwise, the Medical Officer of Health should have reason for including such deaths, under the specific term "Diarrhœa." Deaths from diarrhœa secondary to some other well-defined disease should be included under the latter.
- (f) Under the headings of "Cancer" and "Puerperal fever" should be included all registered deaths from causes comprised within these general terms. Thus: Under "Cancer" should be included deaths from Cancer, Carcinoma, Malignant disease, Scirrhus, Epithelioma, Sarcoma, Villous tumour, and Papilloma of bladder, Rodent ulcer. Under "Puerperal Fever" are to be included deaths from Pyæmia, Septicæmia, Sapræmia, Pelvic peritonitis, Peri- and Endo-Metritis occurring in the Puerperium.
- (g) Under "Congenital Defects" in Table V. are to be included deaths from Atelectasis, Icterus neonatorum, Navel hæmorrhage, Malformations and Congenital hydrocephalus.
- (h) Under "Tuberculous Meningitis" are to be included deaths from Acute hydrocephalus.
- (i) Under "Other Tuberculous Diseases" are to be included deaths from Tuberculosis, Tuberculosis of bones, joints and other organs, Lupus and Scrofula.
- (j) All deaths certified by registered Medical Practitioners and all Inquest cases are to be classed as "Certified"; all other deaths are to be regarded as "Uncertified."

---

In recording the facts under the various headings of Tables I., II., III., IV. and V., attention has been given to the notes on the Tables.

*James Spurr* Medical Officer of Health.

Date *July 9<sup>th</sup>* 1907.

\* As regards infantile diarrhœa and Table V., it will suffice if Medical Officers of Health, who have already tabulated deaths of 1906 in accordance with the schedule of the Incorporated Society of Medical Officers of Health, enter all deaths under one year that they regard as due to diarrhœa under the single heading "Diarrhœa, all forms."

This having been done, it will be necessary that the entry against "Diarrhœa" in column 3 of Table IV. should tally with the sum of deaths under "Diarrhœa, all forms," entered in the final column of Table V.

NOTE.—The Factory and Workshop Act, 1901 (s. 132), requires the Medical Officer of Health in his Annual Report to the District Council much of it as deals with this subject, to the Secretary of State (Home Office). If the Annual Report is presented otherwise than in print, it may be in the form of a statement. The duties of Local Authorities and the Medical Officer of Health under the Act of 1901 are detailed in the Home Office Memorandum and Medical Officers of Health in October, 1906.
